HPE GREENLAKE CLOUD SERVICES

Delivering the cloud experience on-premises
with HPE GreenLake

Bringing the cloud to your apps and data wherever they are.

HPE GreenLake offers choice in how you satisfy the unique needs of your apps and data. But doing hybrid cloud right isn't always as easy as you'd like.

→ How do you evolve to a cloud ops model across public and private?

→ How do you navigate the management complexities of a hybrid environment?

→ How do you transform your people and processes?

68%
see data security and compliance as a barrier to public cloud adoption.[1]

57%
of IT decision-makers said they were pursuing an integrated on-premises/off-premises environment as part of their overall strategy.[2]

40%
of companies will use two or more infrastructure-as-a service (IaaS) and software as-a-service (SaaS) providers by 2021.[3]

Get the cloud experience everywhere.

Pay per use
Speedy insights with pay-per-use and financial flexibility, so you can free up capital, and boost operational and financial flexibility.

Simplified IT
Centralise operations and insights across your hybrid estate from a single intuitive self-service platform—HPE GreenLake Central.

Managed for you
Offload monitoring and management of your on-premises cloud, helping you free up your resources to be more productive.

Time to Market	CAPEX savings	IT resource savings	85% less
75% faster	30%–40%	40%	unplanned downtime
