

DTP ASSESS

DTP Assess helps organisations of all sizes gain a better understanding of their current IT environment to help make informed decisions that align IT requirements to business goals and objectives.

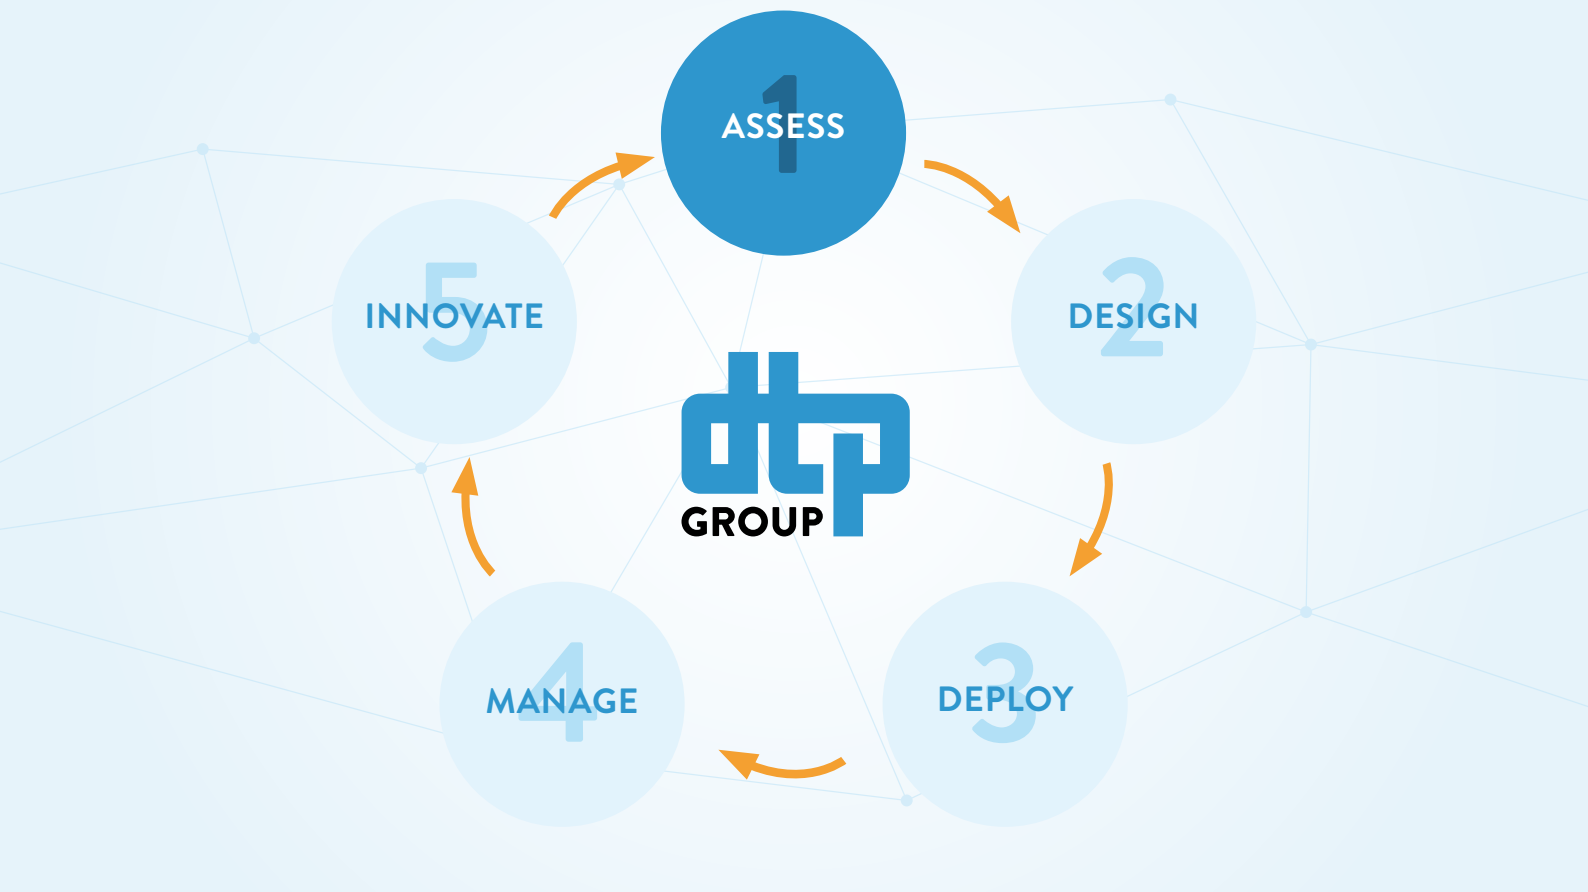

Our consultants undertake a detailed, data-driven analysis of your entire IT estate; **infrastructure, VM's, network, end user devices, and print environment.**

POLICIES, PEOPLE AND PROCESS

We look at how your organisation leverages technology, how it integrates with your business processes, and how it is managed and governed. Our consultation evaluates the technology solutions you have in place and how they support your business functions and objectives, now and for the future.

SOLVING
IT TOGETHER

Gaining an in-depth view of your current infrastructure and technology will enable your organisation to enhance the business value of IT investments through aligning IT initiatives with business strategies.

- Improve operational efficiencies
- Increase utilisation
- Lower costs
- Deliver an improved user experience
- Consolidate technologies
- Maximise uptime
- Identify vulnerabilities and configuration errors

WE LOOK AT HOW YOUR ORGANISATION LEVERAGES TECHNOLOGY AND HOW IT INTEGRATES WITH YOUR BUSINESS PROCESSES.

DTP ASSESS HELPS ORGANISATIONS OF ALL SIZES

Our consultants use the industry's most advanced data-driven technology to collect data metrics on your existing IT hardware and software environment. We then utilise that intelligence to help you make smarter technology decisions that optimise performance and workload placement. We analyse and report on your entire IT environment to provide actionable recommendations that will change your IT environment for good.

Our assessment provides tangible recommendations which can deliver significant savings and operational efficiencies:

- Accurate hardware inventory
- Accurate software inventory
- End user device health check
- Compliance and security validation
- Performance and efficiency review
- Rightsizing options
- Warranty and support check
- Capacity planning and utilisation review
